

People-Safe Restart Services

Safely reopen your facilities during COVID-19, ensuring an ongoing healthy indoor environment for clients, staff and tenants

GROK 
energy services

Efficiency and Reliability. In Balance.

IS YOUR FACILITY SAFE TO REOPEN RIGHT NOW?

Periods of inactivity can result in potentially dangerous, and perhaps unnoticed, indoor environmental problems in your facility. These issues can lead to illness, business disruption, injury or damage:

- Water systems can stagnate (Legionella)
- Indoor air quality (IAQ) can deteriorate
- HVAC systems can grow mould or bacteria
- Electrical connections can corrode
- Structural problems can develop
- Pests can move in and spread

These potential issues can be quickly, easily, and safely identified, then remediated at much lower cost **before** a business is re-opened. This will provide you with peace-of-mind while saving hassle and grief.

GROK Energy Services offers People-Safe Restart Services, designed to ensure your building performs better than ever, while keeping everyone safe. This will leave you free to focus on what you do best: running your business!

DO YOU OPERATE ONE OF THESE TYPES OF FACILITIES?

- Schools
- Agriculture
- Animal Care
- Arenas & Stadiums
- Casinos
- Child Care
- Convention Centers
- Fitness
- Food Service
- Hospitality
- Institutional
- Manufacturing
- Office Buildings
- Retail
- Universities
- Transportation
- Theatres
- Worship

These buildings need special attention to ensure the indoor environment is people-safe **before** opening the doors again.

CONTACT US

Let GROK help you successfully re-open your commercial facilities, with minimal disruption.

EVERY SPACE, CLEAN AND SAFE

LEADING EDGE SOLUTIONS

GROK People-Safe Restart Services are performed by our *Certified Building Commissioning Specialists*, certified by ASHRAE or AEE.

Using our proven workflow, our GROK team of experts will:

1. Examine, test, and document the condition of all building mechanical systems, including:
 - Verify air quality within the heating-ventilating-air conditioning (HVAC) system and indoor spaces to ensure **safety**
 - Verify indoor temperature and humidity are set to ensure **comfort** while maximizing **safety** against airborne pathogens
 - Verify water systems have not stagnated, and are **safe** (free from legionella bacteria)
 - Verify that your electrical and HVAC control systems are **safe**
 - Verify that your indoor environment is **free** from pests and conditions that may cause or spread disease
2. Provide an interim report and help you coordinate any needed repairs or mitigations.
3. Verify repairs or mitigations have been properly completed, compliant with ASHRAE, AEE, local Health Authority, and WorkSafeBC / WSIB standards and guidelines.
4. Provide a final report documenting HVAC, plumbing, and indoor environment condition before re-occupancy.

All of these services are performed affordably and time-efficiently to get your business up and running quickly.

KEEPING YOUR FACILITY HEALTHY

We can help you take further steps to maintain the health and productivity of indoor spaces on a continuous basis, such as:

- GROK Air Sterilization solutions - **kills 98% of airborne pathogens**
- Optimization of HVAC positive pressure, outdoor air, and filtration to minimize airborne contaminants
- Ongoing monitoring systems - identify potential indoor environment issues or hazards before they cause problems

Efficiency and Reliability. In Balance.
